1. Upon reconsideration, indication of allowability of claims 1-29 is hereby partially withdrawn. The reasons are as follows. Delay of this action is sincerely regretted.

Claim Objections

2. Claims 20 and 21 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot be dependent on another multiple dependent claim. See MPEP § 608.01(n). In this case, claims 20 and 21 depend on claims 18 and 19 both of which are multiple dependent claims. Accordingly, the claims 20 and 21 have not been further treated on the merits.

3. Claims 3 and 28 are objected to because of the following misspelling informalities:

In claim 3, last line, "law" should be "low";

In claim 28, line 2, "multiplayer" should be changed to "multilayer".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. Claim 26 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "biomolecules" has no antecedent basis.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has

Art Unit: 1773

fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

6. Claims 1, 7-19, 22-25 and 27-33 are rejected under 35 U.S.C. 102(e) as being anticipated by Caruso et al (US 6,479,146).*

Claims 1, 7 and 27: Caruso et al disclose coated particles by coating template particles with alternating layers of oppositely charge nanoparticles and polyelectrolytes. The template particles include crystal structures, and the coating is formed by first providing the template particles in a dispersion containing a solvent. See col. 3, lines 10-17; col. 4, lines 35-39; and col. 5, lines 8-10. Providing the template particles in an aqueous dispersion as taught by Caruso would necessarily preserve the crystal morphology of the template particles. In addition, although the specification mentions the criticality of preserving the morphology of a crystal core, the claimed process does not contain such limitation.

Claims 8, 9 and 15: See col. 3, lines 18-22.

Claims 10-14: See col. 3, lines 48 to col. 4, line 6.

Claims 16-19: See col. 4, lines 7-34.

(Claims 20 and 21 have been withdrawn from consideration as discussed above).

Claim 22: See col. 4, lines 35-43.

Claims 23-24: See col. 5, lines 18-27.

Claim 25: col. 6, lines 7-15.

Claim 28: See rejection to claim 23.

Claim 29: See rejection of claims 8 and 9.

Claims 30 and 32: col. 5, lines 17-35.

Claims 31 and 33: col. 5, lines 60-63.

Allowable Subject Matter

7. Claims 2-6 are allowed.

8. Claim 26 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

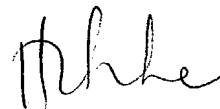

9. The following is a statement of reasons for the indication of allowable subject matter: although Caruso lists organic materials as the template particles, bio-organic materials are not taught or suggested in the Caruso reference.
